Investing involves risk, including possible loss of principal

Fund prospectuses can be obtained by going to <https://www.psprsdcplan.com>. Before investing, carefully consider the fund's investment objectives, risks, charges and expenses. The fund prospectus contains this and other important information. Read the prospectuses carefully before investing.

The use of asset allocation does not guarantee returns or insulate you from potential losses.

INVESTMENT OPTIONS

Target Date Maturity Funds

Target date maturity funds simplify retirement investing by providing participants a mix of stocks, bonds, and other investment funds. Over time, the investment allocation is automatically adjusted to lower the risk of loss to participants as they approach retirement.

Target date maturity funds are typically titled with a year that marks a participant's expected retirement date. For example, a target date maturity fund including the year 2045 is intended for a member expecting to retire in 2045.

Like other funds, target date maturity funds have fees and are subject to market risk and loss of value, which can occur before, during or after the target date. There is no guarantee that target date funds will provide enough income for retirement.

ROLLOVERS

- A defined contribution plan rollover is the process of transferring funds from one retirement plan to another without incurring taxes or financial penalties
- Members and retirees of PSPRS-managed plans may rollover tax-advantaged retirement account plan balances into the 401(a) PSPDCRP
- Rollovers out of the PSPDCRP into qualified tax-advantaged retirement accounts are permitted upon members' separation from service
- Members are encouraged to seek professional tax and investing advice when considering retirement plan rollovers

WITHDRAWING FUNDS

- Participating members may not take loans or distributions for hardships or financial emergencies from this plan
- Upon separation of service, account assets can be but are not required to be rolled over to another qualified retirement plan like a 401(k), 403(b), 401(a) or 457 plan in which the participant participates, or even to an Individual Retirement Account (IRA).
- If a lump sum payout is requested upon retirement, federal/state taxes and penalties may apply
- The public safety penalty exemption for law enforcement, fire fighters, and corrections officers applies when the individual retires in the year they turn 50 or older
- Required Minimum Distributions (RMD) must begin no later than age 73; if separated from service or retired
- Taxes may be withheld at the time of distribution

FUND EXPENSES

- There are no front-end, back-end, or early withdrawal charges or loads in the core funds
- PSPRS DC Committee negotiates for low administration and recordkeeping fees. Fees may be paid entirely through 'forfeited' plan assets leaving no cost to participating members
